# GLIDER

AI Graded Video Responses

Let AI quickly and objectively grade video responses with an accurate analysis of candidate performance, whether in a live or asynchronous interview or during a skills assessment.

Candidate Response

AI Summary

AI Evaluation

HOW IT WORKS: Glider AI removes the inefficiencies of manual evaluation with a consistent, contextual, and data-driven AI analysis.

1. Set Scoring Criteria

3. Candidate Responds

4. AI Evaluates Responses

5. Recruiter Validates AI Evaluation

Top Product Features

AI Graded Video Responses enables faster, fairer, and more insightful recruitment decisions.

AI EVALUATION

Automated grading, AI analyzes grammar, fluency, and relevance for comprehensive evaluation of candidate responses.

CONFIGURABLE EVALUATION

Customizable scoring parameters, for consistent evaluations aligned with job requirement and company standards.

INTEGRATED REPORTING

A reporting dashboard of candidate scores and stakeholder feedback with actionable insights for better hiring decisions.

RECRUITER INPUT

Recruiters can manually override AI evaluations, which include rubric-based scoring criteria for detailed candidate comparisons.
