

Live Coding & Video Interviews

Code & Collaborate with Tech Talent

Glider AI Live Coding Interview Software can simulate any IT or programming environment in a collaborative set-up to confirm job readiness and team fit.

Product Features & Benefits

See How Developers Code & Think!

Verify if Candidates Can Do the Job in Your Technology Stack

Glider simulates your programming environment with tasks so real you can evaluate the candidate's ability to do the job on day 1.

Be Confident About Candidate Identity and Integrity

AI-proctoring coupled with automated ID verification, confirms identity and checks impersonation, lip-syncing, and plagiarism across multiple screens and devices, giving you 100% confidence in all hiring decisions.

Evaluate How Candidates Will Work with Your Team

Solve coding challenges, work on full-stack scenarios, facilitate brainstorms, and whiteboard solutions to assess quality, collaboration, and communication skills.

Make Interviews Fair, Fast, and Objective

Glider standardizes interviews with templates and a questions library, keeping interviews consistent so you can scale and keep them fair and fast.
